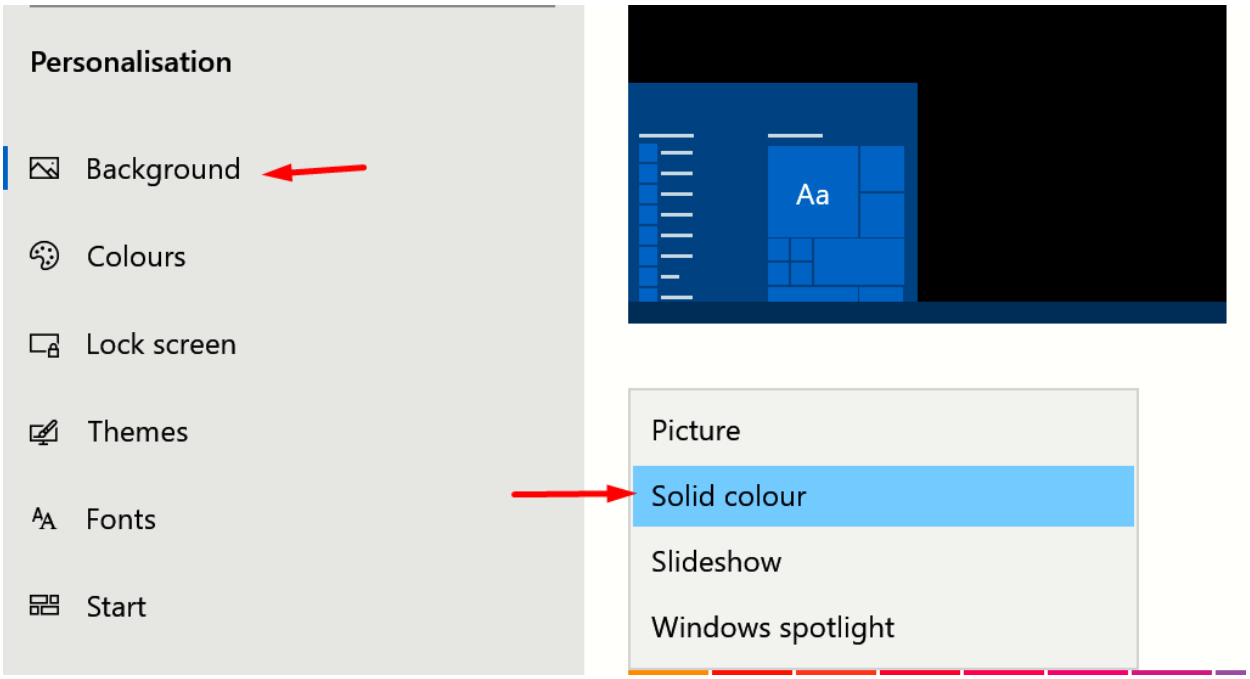
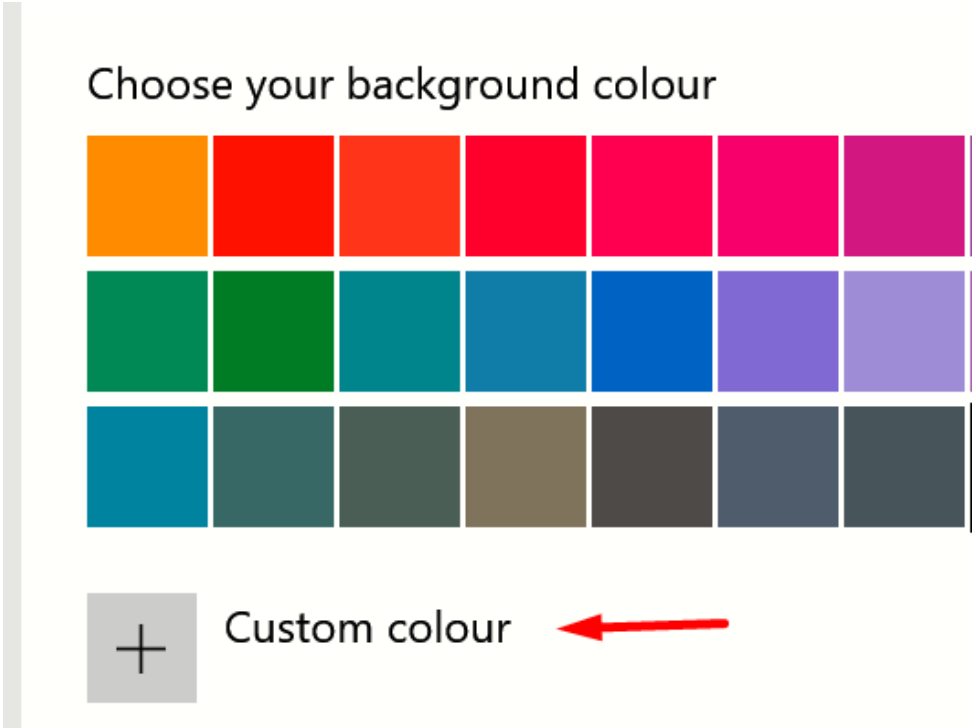
A plain-coloured desktop backgrounds

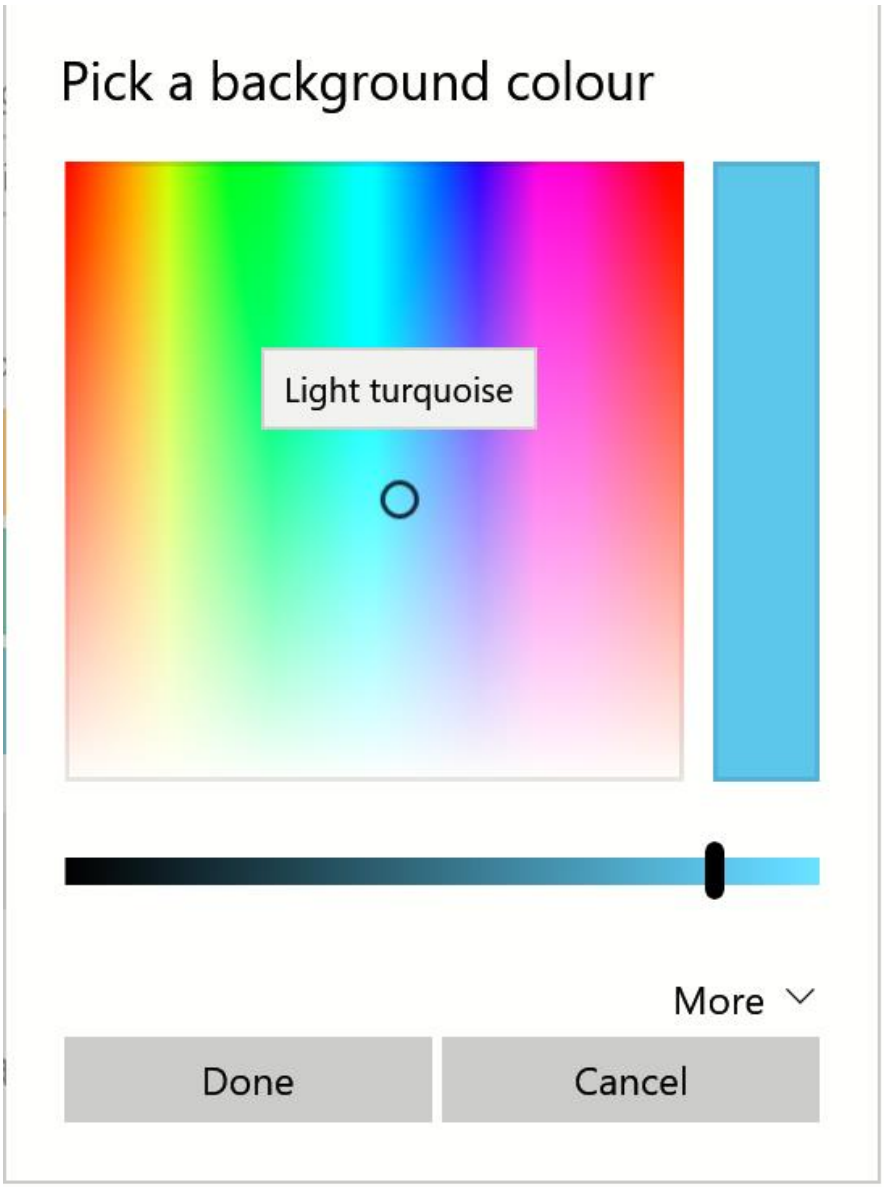
I download images for my desktop background with plenty of clear space so I can see my folders and files clearly. You can have plain coloured backgrounds
In Windows 10, you can make your desktop background any colour you want. Here's how:
1. Right-click on an empty space on your desktop.
2. Click Personalize
3. Click on Background in the menu on the left.
4. Under Background, click the down arrow to reveal the choices… "Pictures", "Solid Colour", or "Slideshow".
5. Click "Solid colour."



6. When you select "Solid colour," you can select one of the colours shown. Or you can choose any colour you want by clicking on the + sign next to "Custom colour".



7. After you click Custom colour, you'll **see. Use the slider and the circle to choose any colour you want. Find a colour and click "Done"**



.

This dialog allows you to choose a background colour in several other ways. In short, you can choose any solid colour you can imagine using this tip.
