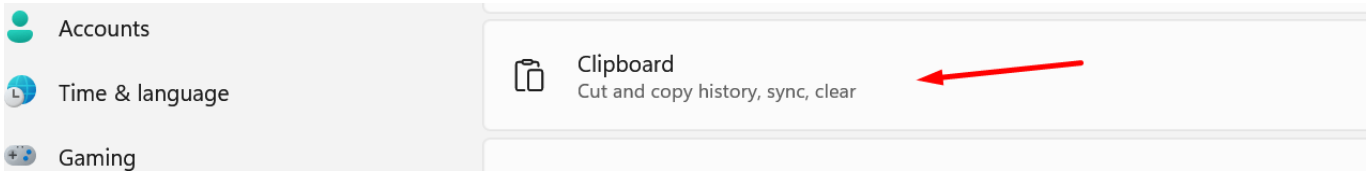
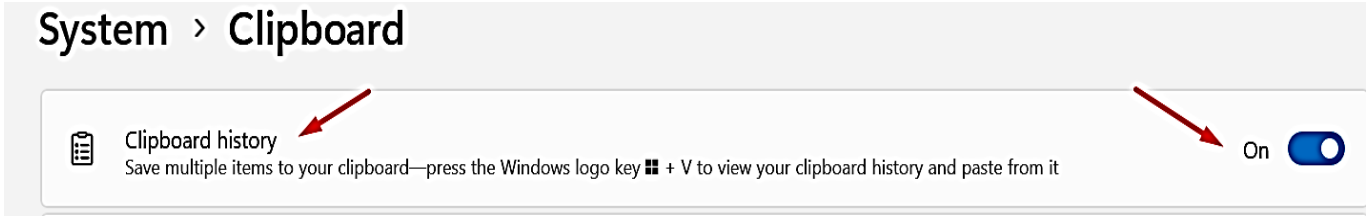
Clipboard History in Windows 11

Open **Settings** and “click on “**System**” Scroll down until you find **Clipboard**.



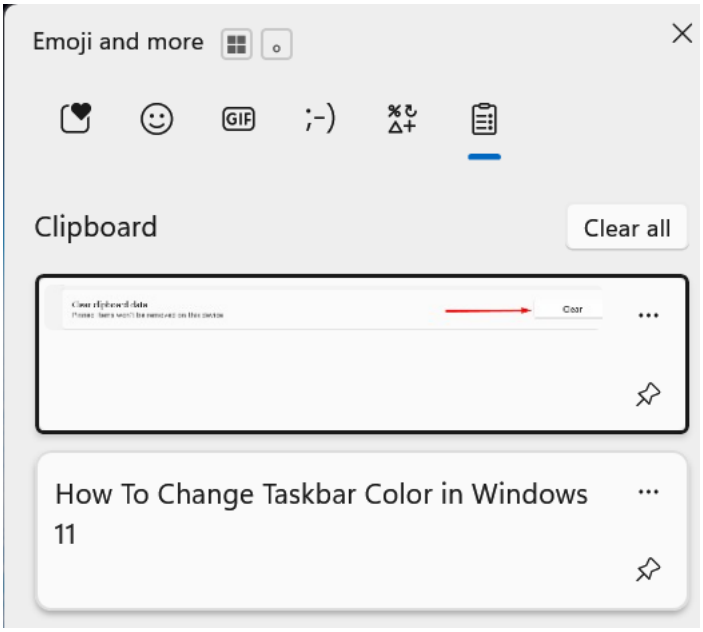
Check that Clipboard History is switched on.



You can clear your Clipboard history here or later from the Clipboard history app. It does not remove any pinned items.

To access your clipboard, press the **“Windows + V” keys**.

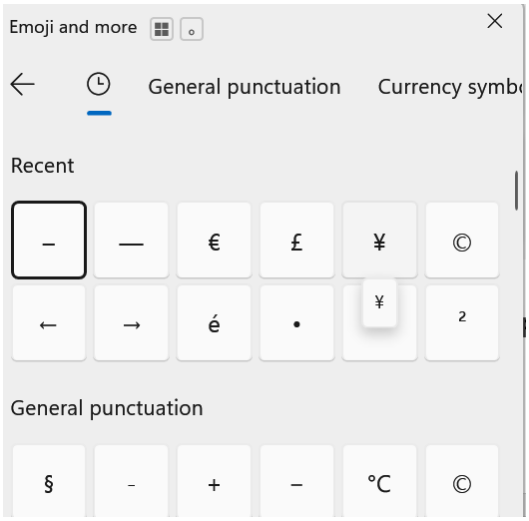
Here is the clipboard.

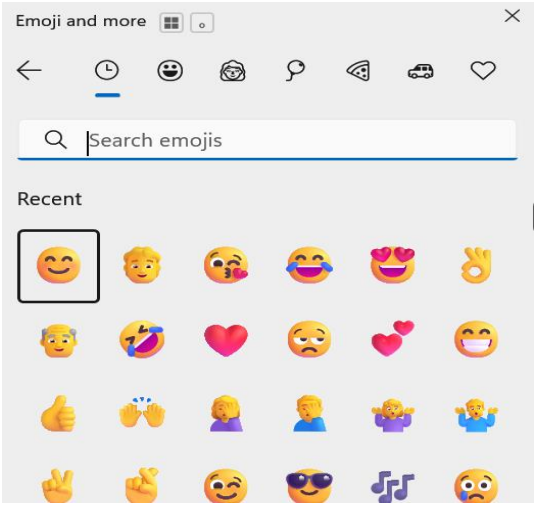


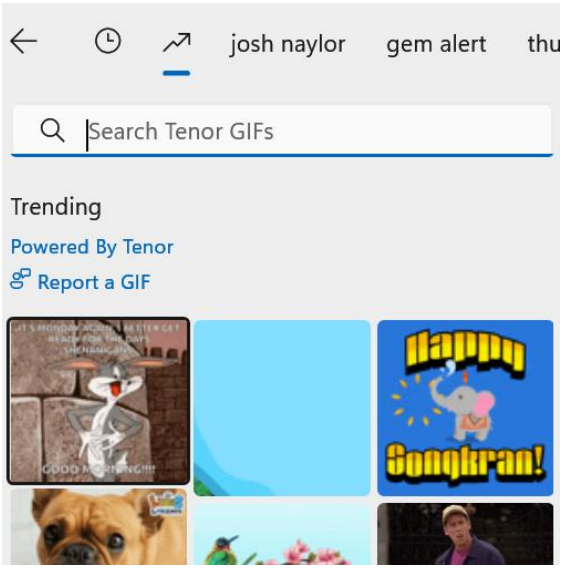
This clipboard is far more inclusive than the one in Windows 10.

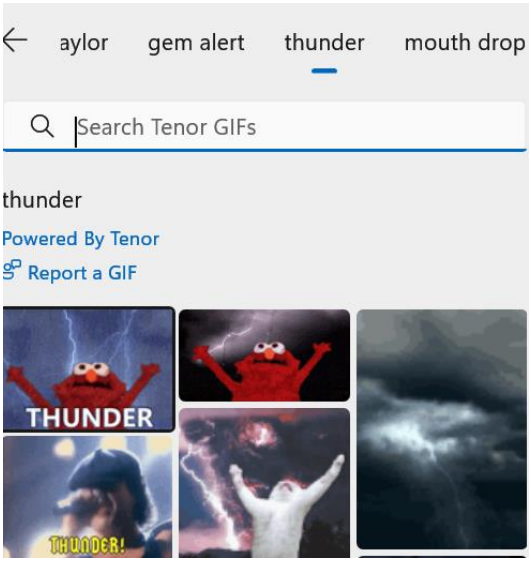
- **You can do everything the same as in Windows 10 such as pinning items but it now as more items such as; -**
- Pasting general punctuation
- currency symbols
- Latin symbols
- Geometric symbols
- Maths symbols
- Supplemental symbols
- And language symbols

Access to all these are on the top row of Clipboard History. I will click on some options.









I did a search in the gifs for Cheers,

Norris
