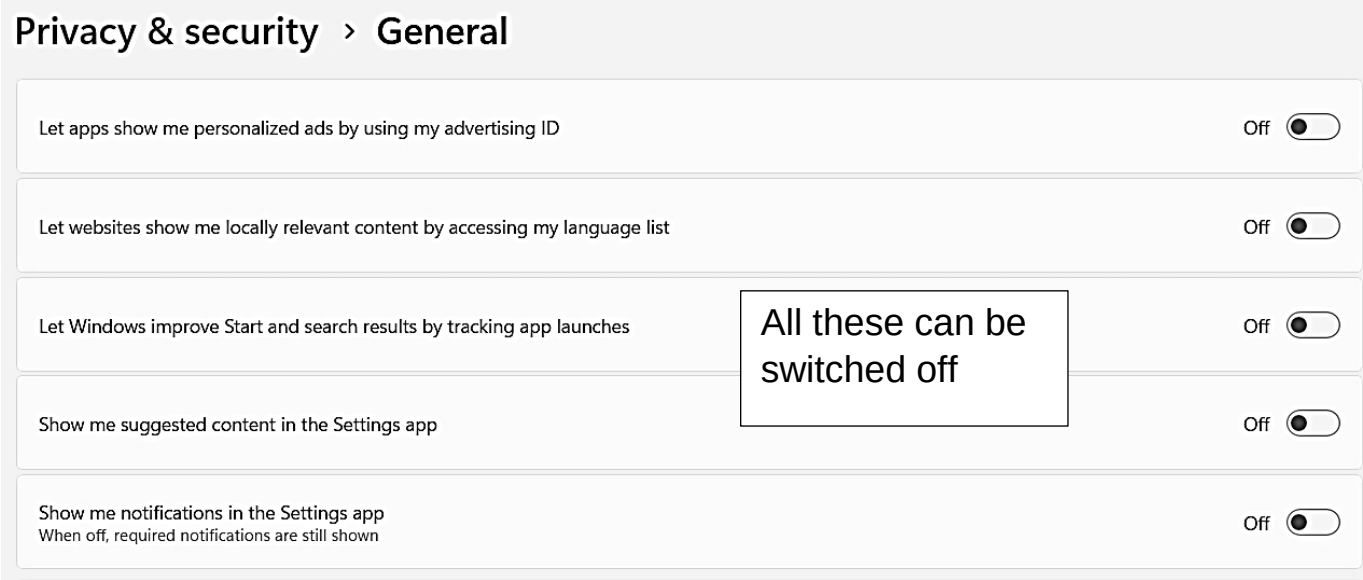
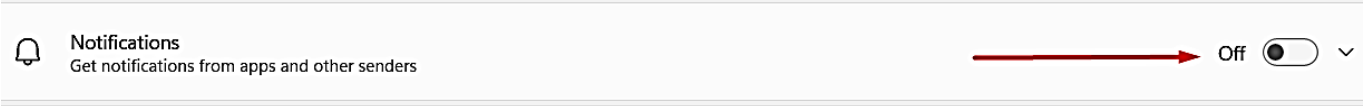
Turn off Personalized Ads and change Sleep modes

- **Open Settings**
- **Go to Privacy and security**
- **Under Windows Permissions click General**
- **Toggle items Off as below.**



Disable Suggested Content

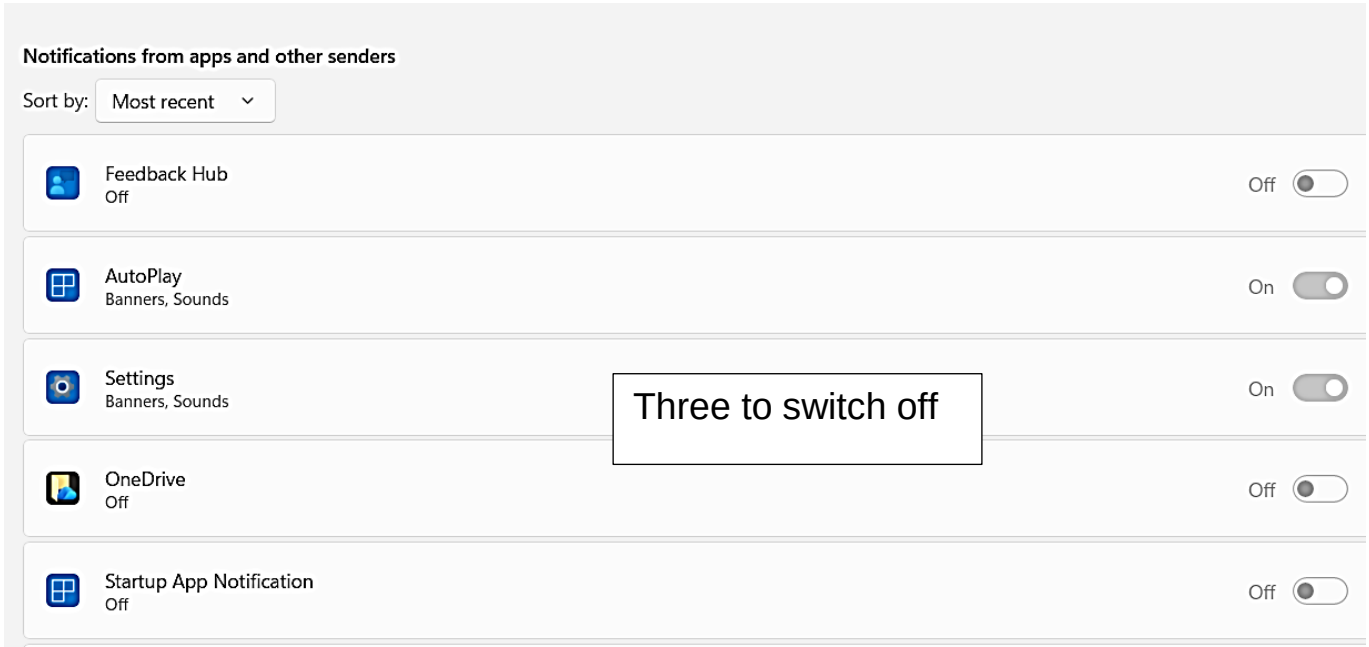
- **Open “Settings” and click on “System”**
- **In Notifications switch it “Off”**



Below this switch “Do not disturb”, switch Off

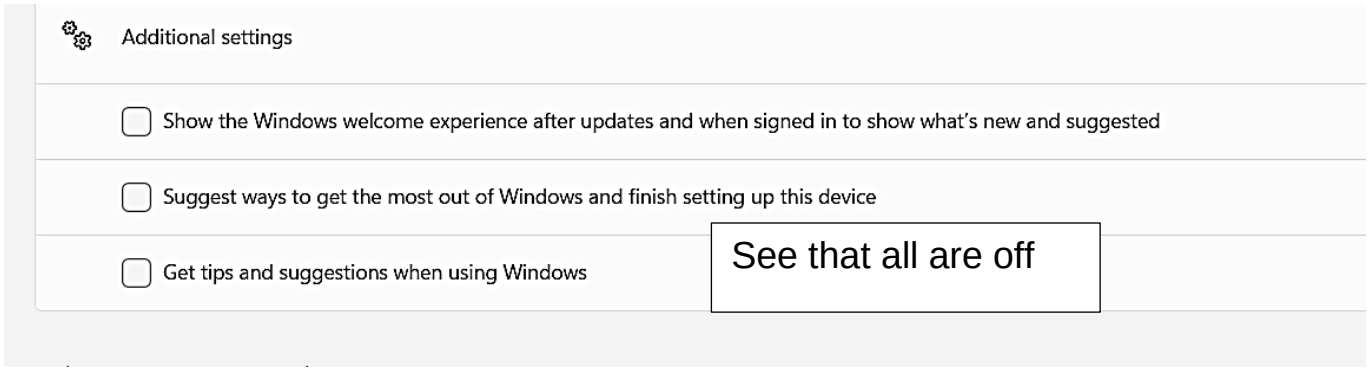
Scroll down to; - “**Notifications from Apps and other senders**”

Look at my choices of “On” and “Off”



Scroll down and click on additional settings

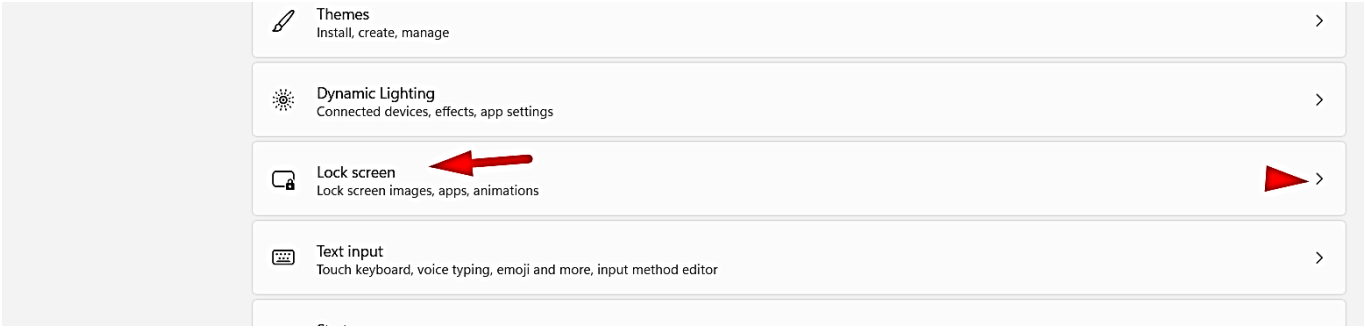
On the drop arrow on the right see that they are not ticked.



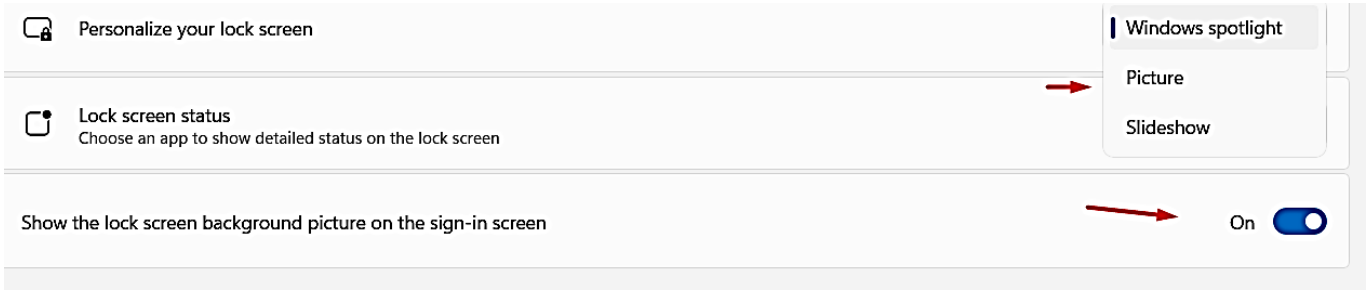
Next; -

Remove Lock Screen Ads

- **Open Settings again.**
- **Click on “Personalization” in the left Column.**
- **Scroll down and Click on “Lock Screen”**

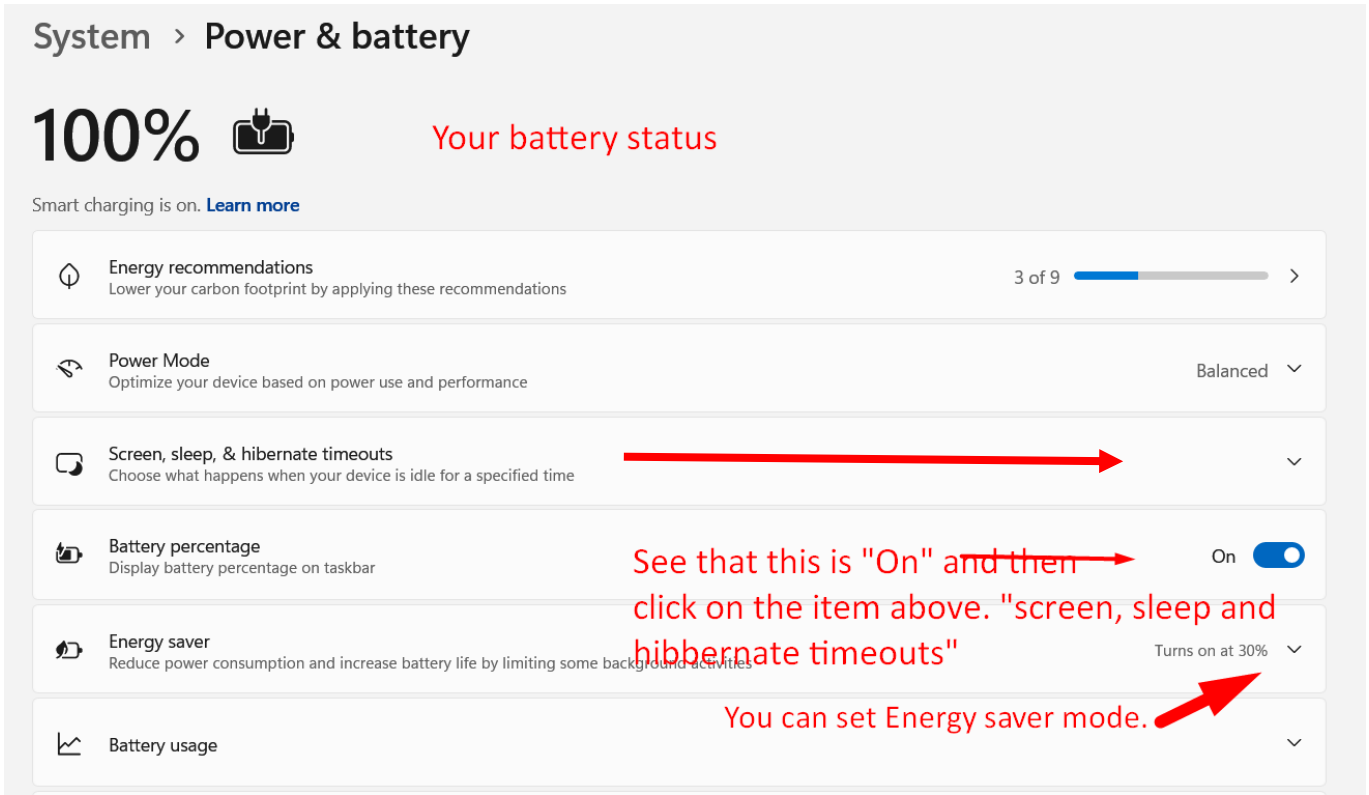


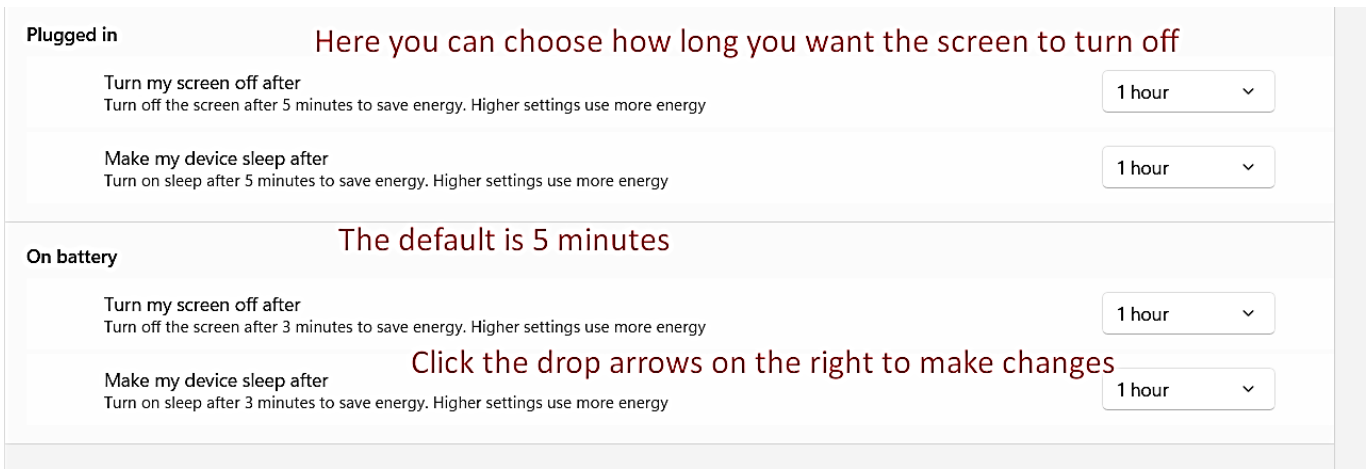
You can personalize your lock screen



Scroll down to “Related Settings”

Click on “Screen Time out”. Make Battery percentage **on**”, **Energy saver** mode can be changed, and then click on “**Screen sleep and hibernate timeouts”.** This annoyed me for it was set as 5 minutes and I had to keep signing



in.


Now you can control your screen. My default was “5 minutes” but this is too short for me**. You choose what is suitable fo you I chose 1 hour.**
