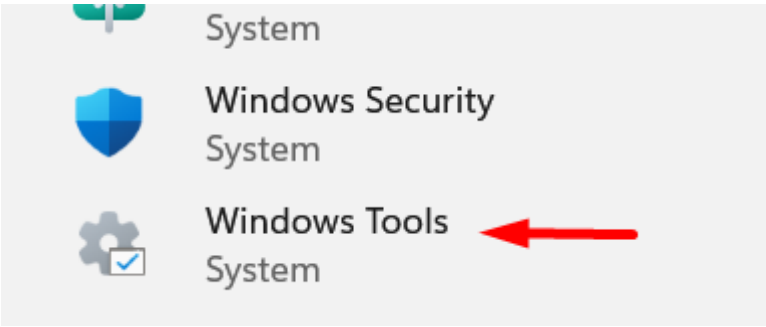
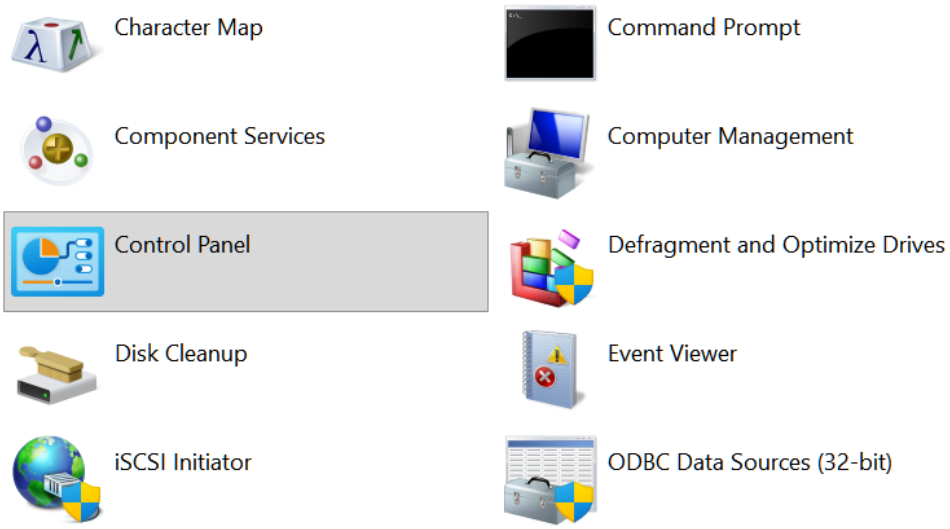
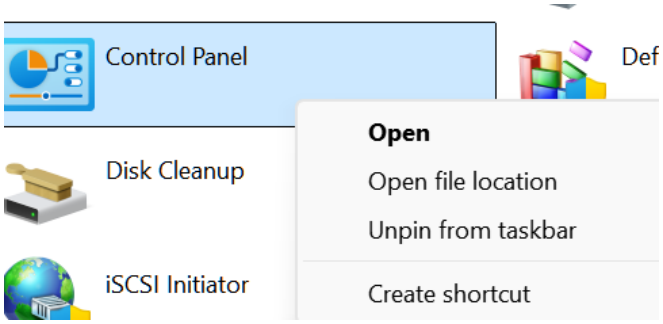
Windows Tools in Windows 11

Open the Windows start menu. Click on “All” to see the alphabet of programs and go to “W” to find Windows Tools. Open it



There is a huge amount of information here- a super “Windows Accessories”. Here are just a few. We can explore more later. I am going to right click on “Control Panel” and pin it to my Taskbar.





Well it is already there so I won’t unpin it and will leave it there.
