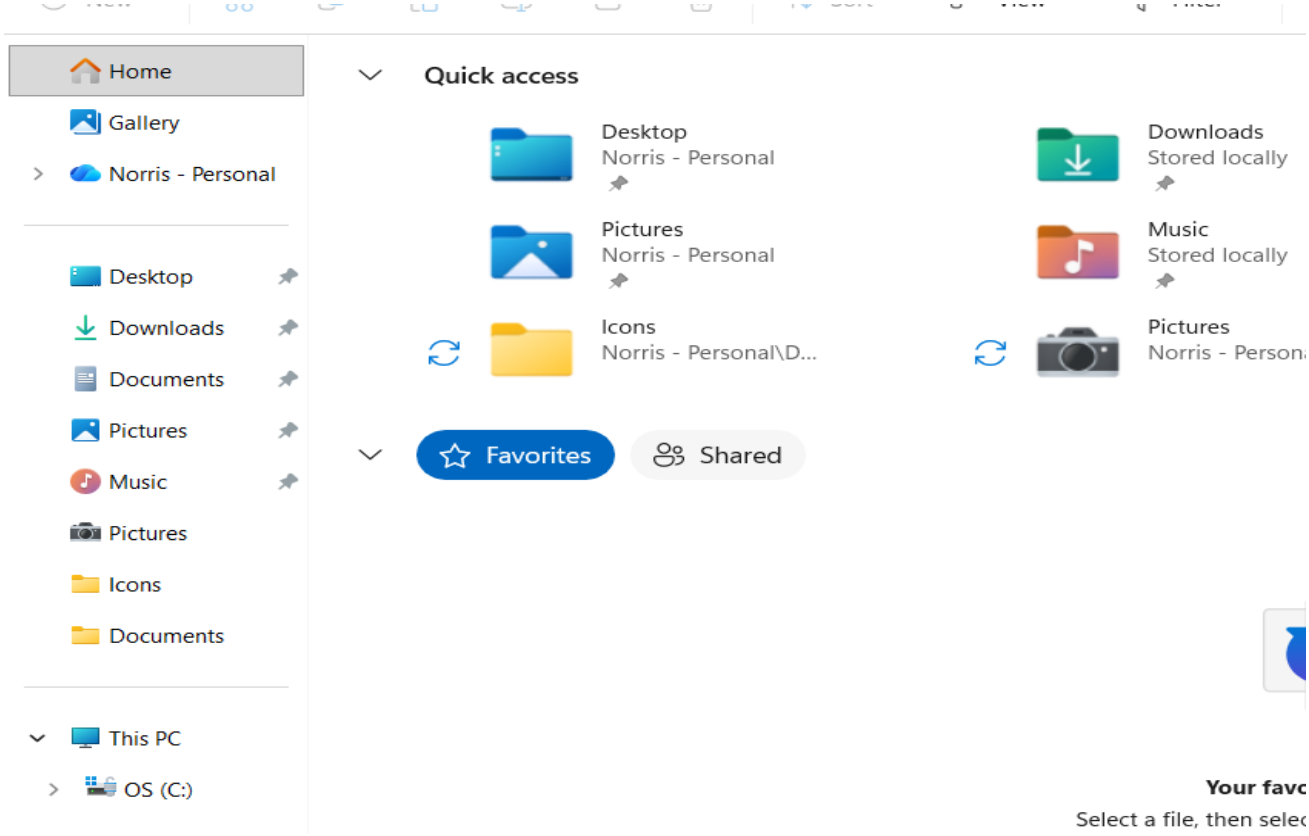
File Explorer and Control Panel. Two important links on my taskbar

File explorer already comes on your taskbar. I have shown how to put the Control Panel on it in another tutorial

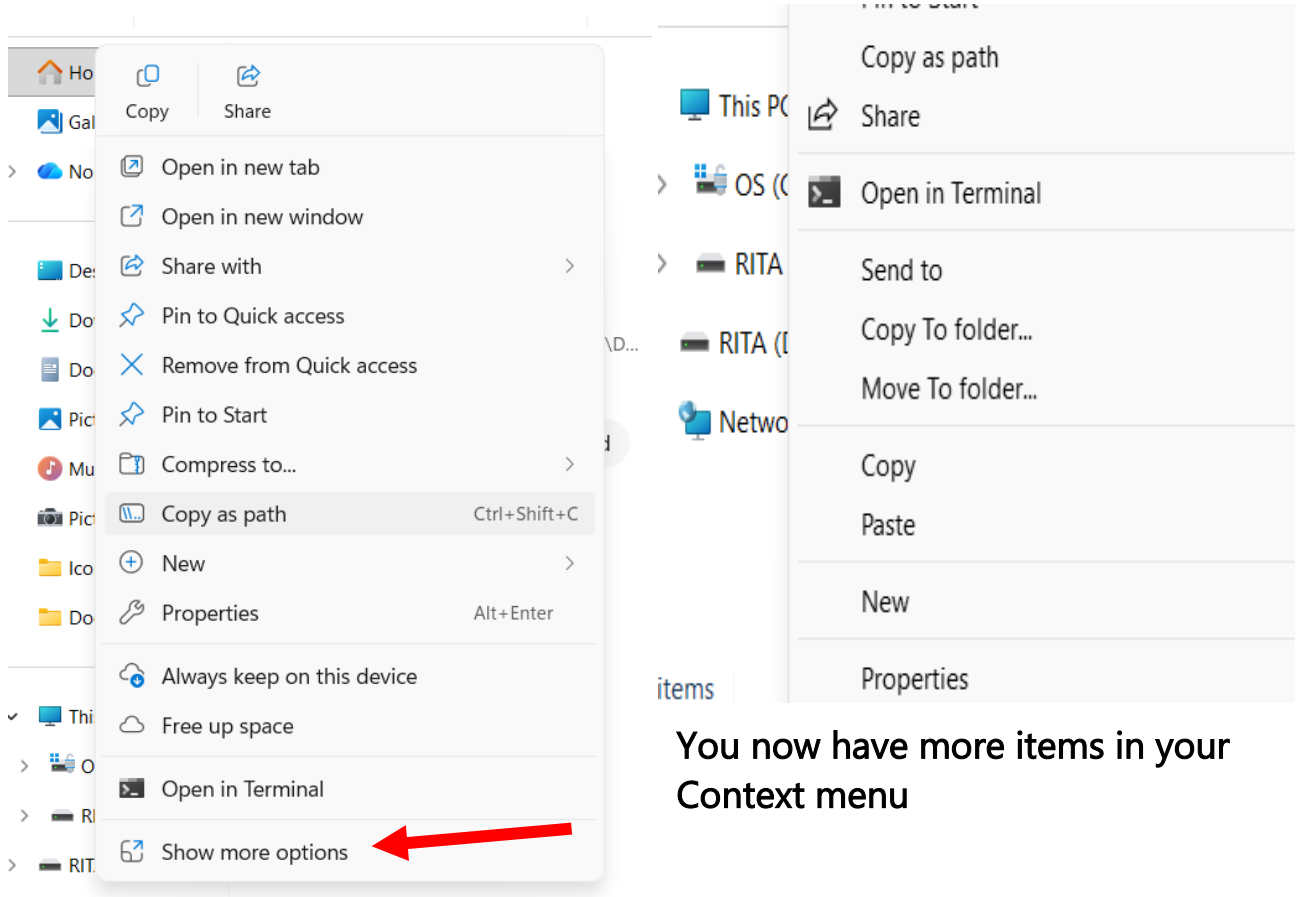
File explorer is Microsoft's preferred access to your Computer. Windows 11 comes with it on the taskbar. I will open it.

Here you can open all your major Apps here on the left and on the right.



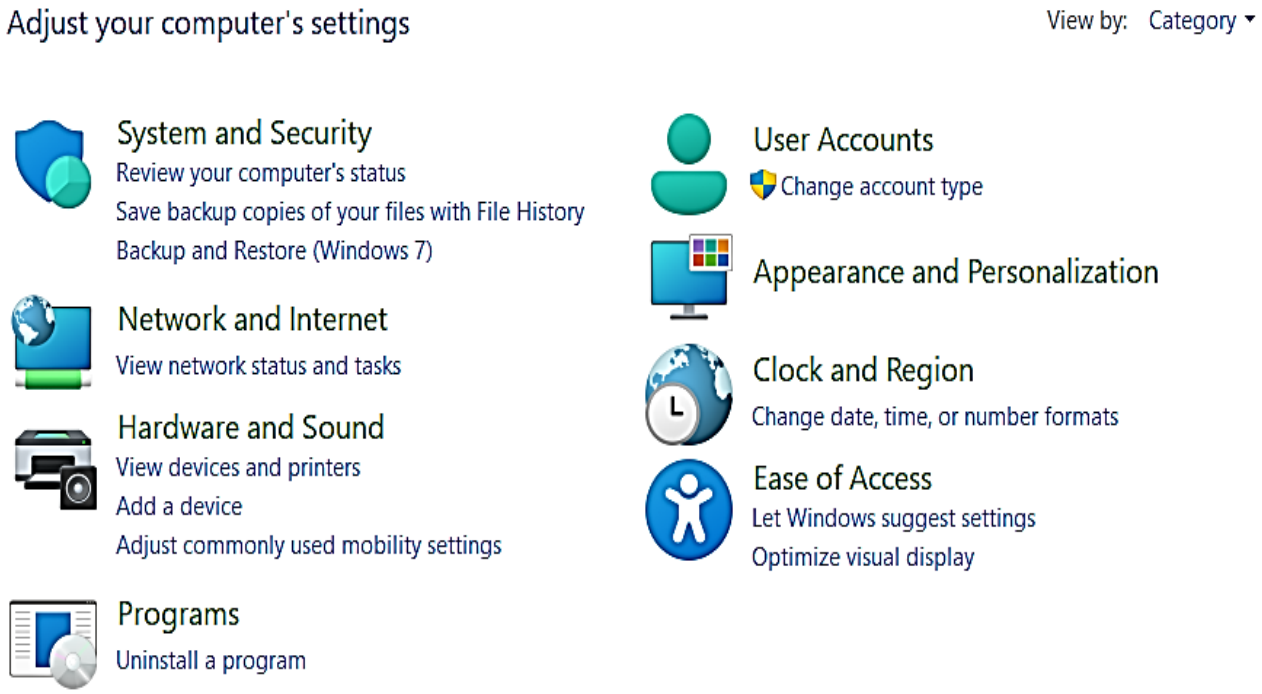
I will open it and right click on "Pictures"

See all the options that you have in the context menu. Then click on “show more options” at the bottom of the list.

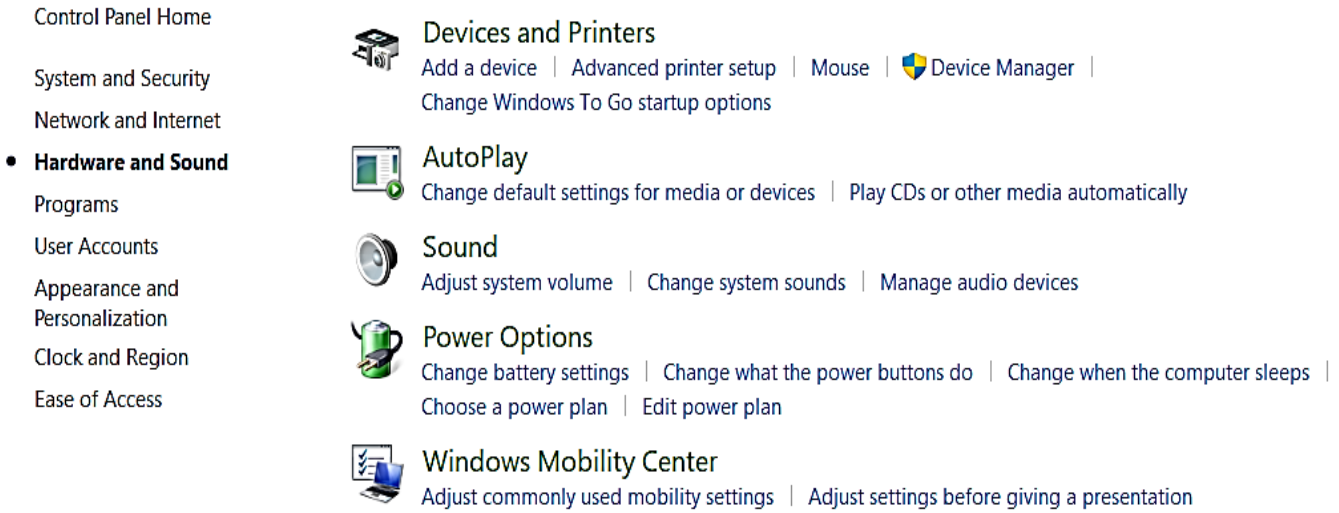


You now have more items in your Context menu

The control Panel is still important to access many settings



There is a huge amount of options- change or add to your clock. Check items like your printer, uninstall programs. I will open just a couple by clicking on them.



Control Panel Home
System and Security
Network and Internet
Hardware and Sound
Programs
User Accounts
Appearance and Personalization
Clock and Region
Ease of Access
Devices and Printers
Add a device | Advanced printer setup | Mouse | Device Manager |
Change Windows To Go startup options
AutoPlay
Change default settings for media or devices | Play CDs or other media automatically
Sound
Adjust system volume | Change system sounds | Manage audio devices
Power Options
Change battery settings | Change what the power buttons do | Change when the computer sleeps |
Choose a power plan | Edit power plan
Windows Mobility Center
Adjust commonly used mobility settings | Adjust settings before giving a presentation
