

Folder Magic

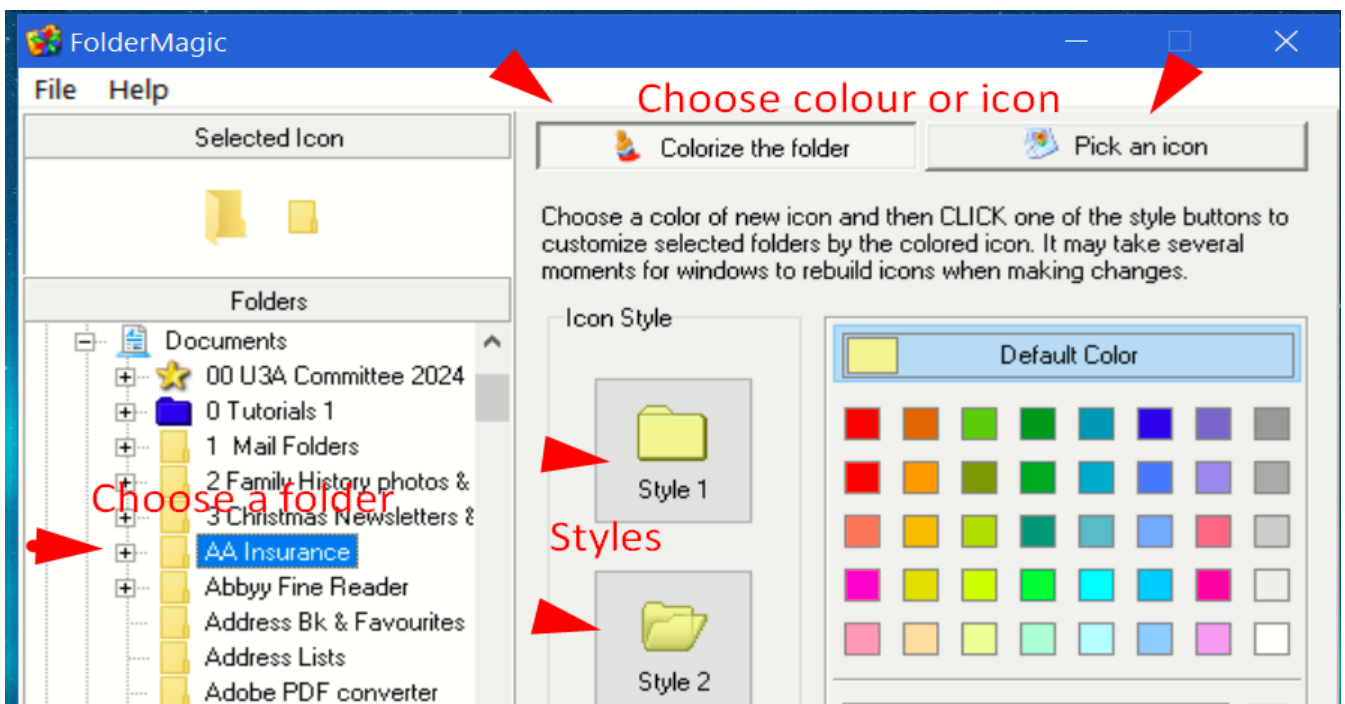

This application is a very interesting way of changing colours and putting icons on plain yellow folders. It is free but an old app and Microsoft is always wary of that.

Some examples

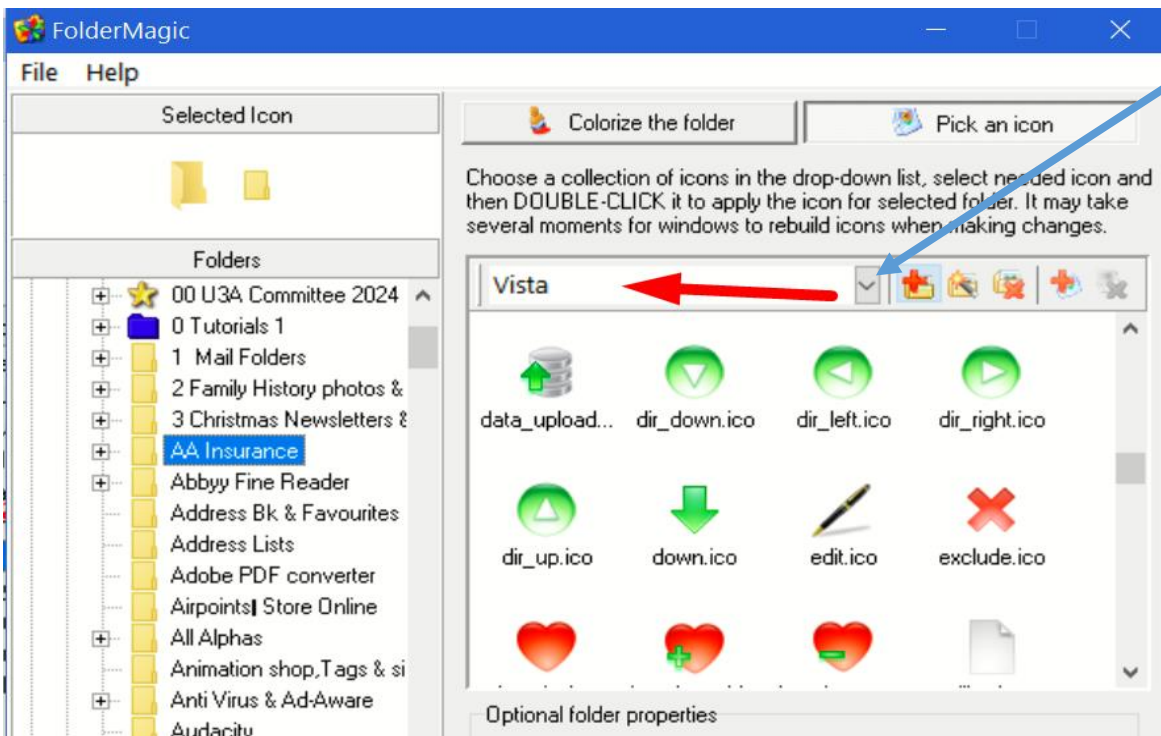

When you wish to change a folder, open the app and in the left hand column browse to the folder you wish to change and highlight the folder. Choose either the colour or icon tab and **then double click on the colour or icon** you want on the folder and it will change. Note that there are two styles of folder.

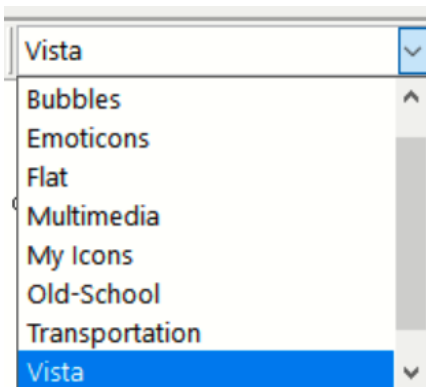

If you chose the Icon tab you have choices of the kinds of icon.

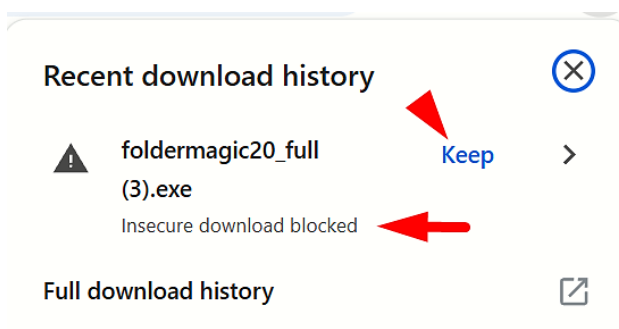

There are several types of icon. The default is usually "Vista" for the program was written then but it works for windows 10 and 11

Using the drop arrow next to "Vista" you can find other types of icon but you will have to download them. See the image below

Now to explain about downloading the program and extra icons. Because it is an older program FolderMagic is safe but it's no longer supported and Microsoft warn you about this when you click on the download link I have put below.

You will see this and to download it you must click "Keep" or the download arrow.

When you do this it will go into your downloads folder for you to double click on it to load onto your computer. Just follow the instructions and agree. Note you won't see the number 3 for this shows me that I have downloaded it three times.

To add Additional icons available free click on this link [Icons Packs Page](#)

See below

Additional Icon Packs for FolderMag FREE for all users!

These four extra icon packs
are available

Icon Packs are available to add to the hundreds of

Available Icon Pack Add-ons

- [Emoticons Icons Pack](#)
- [Elements Icons Pack](#)
- [Transportation Icons Pack](#)
- [Multimedia Icons Pack](#)

I will click on the
“**transportation**” pack. The
pack will try to go into your
download folder. You will see
the image below

Transportation Icon Pack for FolderMagic

--click here to return to main add-on packs page--

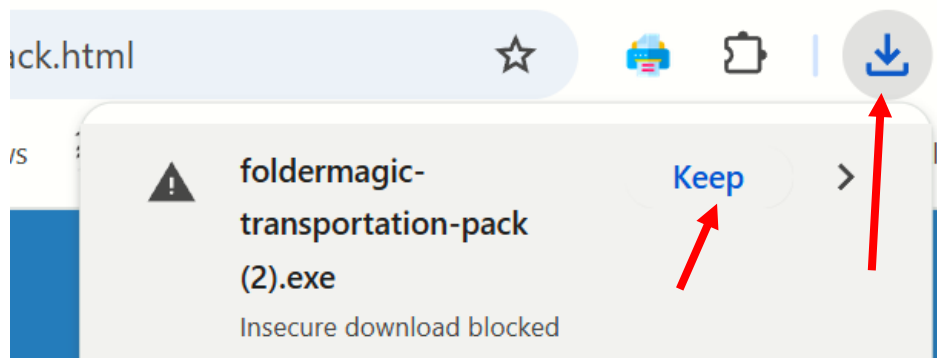

This add-on set of icons for FolderMagic is free for all users of FolderMagic! Easy to install!
Simply click to download, choose "run" or "open" and your icons will install into your FolderMag
Program and be ready to use to decorate your computer folders!

[Click here to install Transportation set of icons for FolderMagic.](#)

Then either click **Keep** or click the **downloads arrow**.

Once it is in the download folder double click it and follow the instructions. Note the
“2” just means I have downloaded it twice.

Then you can download other icon packs in the same way.

Sometimes the process seems tedious but that is what I do

Cheers

Norris

However I have written a tutorial on how to make and insert your own icons onto a
folder.
