

## Record your voice

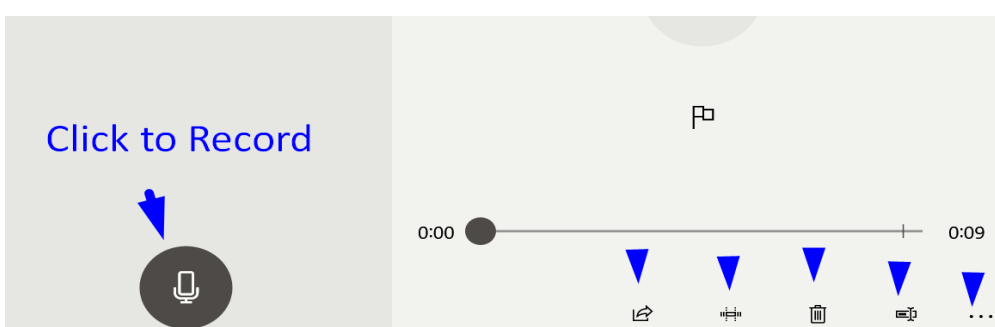

Type "voice recorder" in the search bar and click on the App when it appears

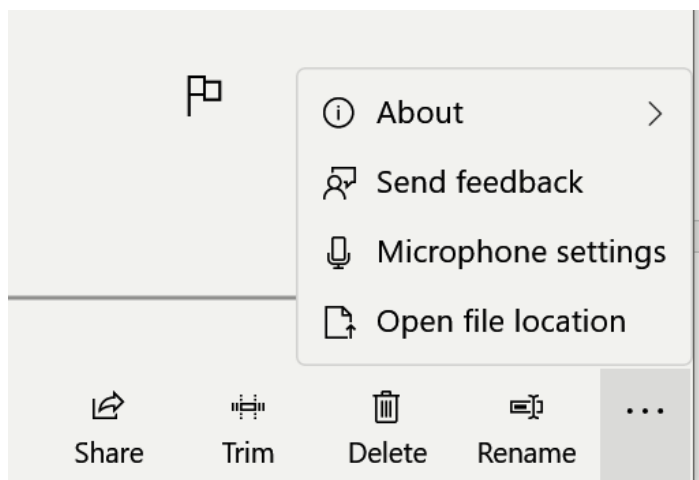

It may take a few seconds to load and if your camera isn't activated it asks you to do so. Then you will see the recorder

The arrows are from the left; Share; Trim; Delete; Rename and Settings

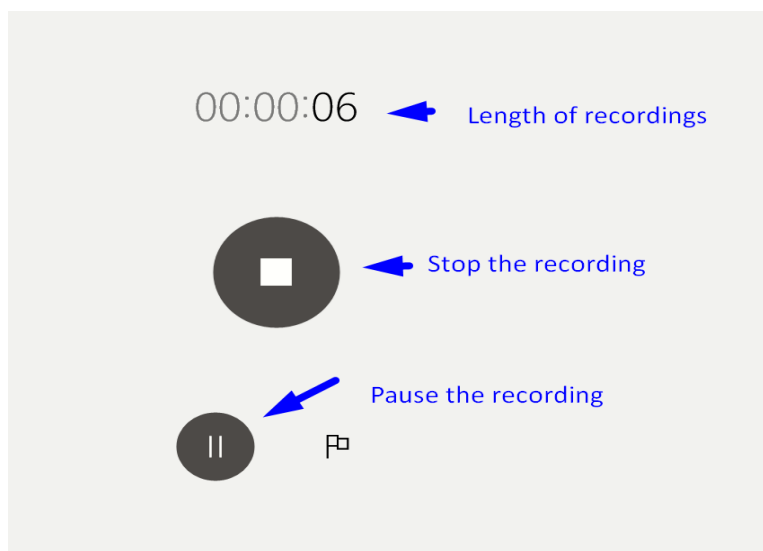

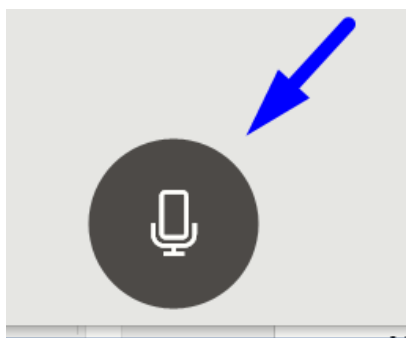

When you open the settings you will see these four options.

When you want to record a message write down the message first. It will be a great help. Speak slowly and be close to the microphone. You will make mistakes and you can delete them.

Now to start recordings. Click the microphone.

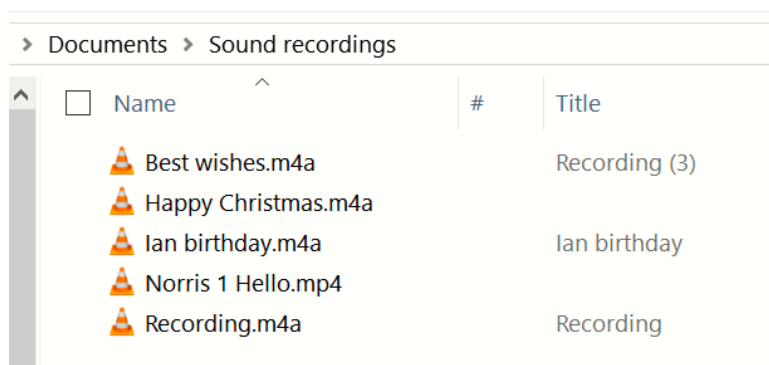

Now you will see the time

You can stop the recording and it will be saved

You can pause the recording and then continue.

If you don't like the recording highlight it in the left hand column and delete it and start again.

The sound recordings are automatically stored in the “**Documents**” Folder under “**Sound recordings**”. Note that you can always use the **playback arrow** to hear the recording you have made.

If you wish to put the recording into an email the open the email, attach the recording and the recipient will hear it when they open the email and click on the attachment.

If you don't have a voice recorder you can install one from the Google Play store.
