

## You Tube downloader

I've been testing a different way to download YouTube videos that (as of today) still works and is quick, easy, and allows you to download YouTube videos in different qualities.

Here's how I do it...

1. Click on this link <https://y2mate.com> and paste the URL (web address) of the YouTube video you want to download and click **Start**.

The screenshot shows the y2mate.com website. At the top, there's a navigation bar with links for "YouTube Downloader", "YouTube Converter", and "YouTube to MP3". The main heading is "Download Video and Audio from YouTube". Below this is a search bar containing the URL "https://www.youtube.com/watch?v=Opxhh9Oh3rg" and a red "Start" button with a right arrow. A small disclaimer below the search bar reads "By using our service you are accepting our Terms of Use." On the left, there's a video thumbnail for "The Beatles - Now And Then (Official Music Video)" with the Vevo logo. On the right, there's a table of download options under the "Video" tab.

File type	File size	Action
MP4 auto quality	MB	<a href="#">Download</a>
1440p (.mp4) <small>2K</small>	108.7 MB	<a href="#">Download</a>
1080p (.mp4) <small>HD</small>	71.8 MB	<a href="#">Download</a>

Now you have choices.

As you can see from the screenshot above you can download the video in MP4 format in several different qualities including 1089p (HD) or 1440p which is more than 1080p (1920 x 1080) but less than 4K. They also offer other download formats. Simply click a green download button to download. The auto quality is OK

## Now the Quick way

Find your YouTube video and on the top toolbar put "pp" between YouTube and .com. See in the screenshot below.

A new link appears and then click on it and choose your file size to download. It will convert the video and on completion it will go into your downloads folder.

The Beatles - Now And Then (Official Music Video) ✕

[Download .mp4](#)

Thank you for using our service. If you could share our website with your friends, that would be a great help. **Thank you.**

**Tip:** Insert "pp" after the word "youtube" in the link to download videos and mp3 files from YouTube as a faster way.

<https://www.youtubepp.com/watch?v=VuNlsY6Jd>

Just click on the green download button on that popup to download the YouTube video to your computer.

Once the download has been completed, you can play the video on your computer. I use VLC Media Player on my PC and the video I downloaded played perfectly.
